Head fever: Mythology - this is an action game in which you have to fight various creatures and gods of Greek, Scandinavian, Slavic and Egyptian mythologies. Take on the role of a mysterious gentleman who travels through different worlds in search of the most difficult opponents. Game features: - Souls-style combat system - 20 bosses - 6 types of weapons and 6 types of items to choose from: 운체山: Windows 7, 8, 8.1, 10프山山: Intel Core 2 Duo山山: 2 GB RAM山래山: NVIDIA® 9600GTDirectX: 버山 9.0 2 GB간 2 GB용 2 GB능 the Game간추pad recommends summoning, some of you We are still working on solving this problem for you, but don't worry. You will receive the gift. It will probably be early next week as we need some time to do some more research, and make sure we're going to deploy this properly. There is no need to send a Support Ticket, as we will take care of it automatically. So the new head quickly was released today, and I have to say that while it's not the hardest piece of content ever, it can definitely cause a lot of problems to some people. I will do my best to analyze what I did, and other strategies I thought about. That's just my opinion, if anyone has more strategies they're free to list below. KING GROOT: Probably the easiest fight in there. Any champion can do so, as long as they can rule out regeneration. The mystical node in the room might make it a little harder if you use an overturned champion like Dr. Voodoo or the Scarlet Witch, but the fight is still feasible. The best options are probably loki or empty, as loki can constantly steal all furies and regeneration, while the void can reverse healing. FINAL SUGGESTIONS: Empty or loki, if you can bring both (vacuum has potentially 3 other uses in search too)DOMINO: A definitely rough fight. There is a way to take her down using champions like hyperion or infinite war captain of America with mastery of maximum despair, but she probably wants to look for other ways. Void is a strong counter, but combining its unfortunate debuff and natural decline to its skill accuracy while battling it can cause problems, as its debuffs might not be applied or replaced with fear of emptiness. Archangel works best, as reducing capacity accuracy does not make the fight as random as it is empty. FINAL SUGGESTIONS: Archangel, voidQUAKE: Even though it actually helps you here, since you can't talk. You their openings by evading special or heavy attacks. You can use MODOK, play really passively, let it build regeneration stacks and then hit it with a special 1, although I don't recommend it. It is likely that you can demolish it with any as long as regeneration is not out of control. FINAL SUGGESTIONS: Killmonger (class advantage, a way to get an opening with counterpunch charges, 2 more potential uses in pursuit) INVISIBLE WOMAN: The debuffs that apply to you will get the node that grants you a power bar every time you get one, so be prepared not to throw many specials if you don't deal with them. Killmonger works very well for the fight, any champion with bleeding makes it easier. FINAL SUGGESTIONS: KillmongerSYMBIOTE SUPREME: Power gain for days. Sometimes he won't even throw his specials, making you eat a sp 3 in your face and dying. Your health pool isn't that high, so, theoretically, you could just carry a heavy hindrter and do as much damage as you can in one go, and then relive it. The pop doctor and the spider man can be options, doc oc in order to feed him and the spider man in order to chain stunts with his special 1. Gambit should be able to catch him too. The best acrobatic lock option is by far hulk though, especially if you have gap in the computer as well. Go in, try to get to a special 1. If you don't, relive it with a Level 1 health potion and try again. By the time you parry, the empty synergy will kick in and launch and give you 1 power bar to start the chain. FINAL SUGGESTIONS: Hulk (easier with empty synergy)TASKMASTER: You can deal with any champion either playing around icarus or just go berserk and do as much damage as you can with the huge amounts of furies you'll have. Killmonger with empty synergy works very well here too, as it will often shrink from the icarus-caused degen. allowing you not to worry about the node, and to deal with massive amounts of damage. FINAL SUGGESTIONS: Killmonger (hollow synergy)END BEST TEAM:1. Loki (groot king)2. Vacuum (synergies, potential help against the domino)3. Archangel (Domino's, potential use against inv. Female or taskmaster)4. Killmonger (Inv. Woman, Taskmaster)5. Hulk (Symbiote supreme) In Boss Rush: Mythology you take on the role of a mysterious gentleman who travels through different worlds in search of the most difficult opponents. The players will fight with unique heads one after the other. Seal them all. Each boss has different attacking paternals, unique skills and various powers! Game features: - Souls style combat system. Hard, but really rewarding! - 20 heads. Unique and challenging fights! - 6 types of weapons and 6 types of items to choose from. - Easy difficulty included if you want to fight bosses with additional help.
